GARDENS WHERE?

Where can gardens grow?

They can grow in the country. They can grow in big yards. These are not the only places. Some gardens grow in cities. Some gardens grow in schools. Some gardens grow in small homes. Some gardens grow on rooftops! The Lettuce Grow Farmstand can grow in all these places. Our vertical gardening system does not need a lot of space which makes it a great option for everyone! It does not need soil. It needs water, light and food. The Farmstand can grow in all kinds of places, inside and outside!

Write **yes** or **no**.

1. Do all gardens need lots of space? _____

2. Can some gardens grow indoors? _____

3. Tell us what The Farmstand looks like.

4. Write four places you might see a Lettuce Grow Farmstand.

"Gardens Where?" Answer Key
