

WE CAN NAME PARTS OF A PLANT

Flower

Leaves

Stem

Roots

How to use your “Parts of a Plant” Mini Poster

Display the poster. Tell students that the poster shows several parts of a strawberry plant. Point out each labeled part and name it.

Explain the main functions of the plant parts:

- A vegetable is the edible part of plant
- A leaf captures light to make food for the plant.
- A stem supports a plant and takes water from the roots to other parts of the plant.
- The roots take in water.

Refer to the poster periodically throughout your Farmstand growing process. Encourage students to use the correct plant part names as they describe their observations.
